

Sample Questions & How I use It

This document contains strings of questions you can use to help learn how to use Oracle, learn how it responds, as well as provide you with ideas for the types of questions you might ask. ***This is not comprehensive.*** I personally use Oracle as a study tool when working through daily devotionals, or to critically assess dilemmas by describing the situation in detail and asking “what’s the principle issue with this?” or “how can I [describe yourself, life-circumstances, etc.] get involved” or help with this issue?”. ***Consider yourself to be an artist or engineer when using Oracle, asking questions, searching for answers, and using this tool to serve you in learning, creating, developing your perspective, and identifying solutions.***

With that, Oracle is built to provide “answers for life and faith” from an entirely biblical worldview, in contrast to widely available AI tools. It’s excellent at identifying the primary message of a text and providing simple suggestions to live faithfully, as well as any other task text generative AI platforms are capable of.

Remember to start a New Chat whenever moving from one topic or question to another. ***Do this for the sake of accuracy & helpfulness.*** That is because Oracle may assume each question has something to do with the last questions you’ve asked, which will convolute its responses.
